

A man's view of the world...

Like most men I find the idea of reading an instruction manual quite abhorrent as clearly men have an inbuilt sense of how everything should work. Or so I thought.

The first time I used Gorilla Glue I gained a very dim view of the product as quite simply it did not seem to stick anything and made quite a mess. Only upon reading the back of the packet as I was about to throw the glue away did I notice that the product will only work if one of the surfaces has been moistened with water. I tried again and discovered, in my opinion the best adhesive product range available today.

I am now so impressed with Gorilla products that we have invested in a display of the entire product range.

Gents you will be interested to know that many of us have failed to read these instructions. But the really good bit. Most of the ladies make the same mistake.

Soda Crystal Success...

Did you see our article in Yare Valley Voice last month which looked at all of the wonderful uses around the home for Soda Crystals?

We were really grateful to those responsible for this publication as it really did help to highlight the importance of traditional and effective cleaning products. Products which are more friendly towards the environment whilst being a cheap and effective solution to many cleaning issues.

We sell a wider variety of products from the manufacturer of Soda Crystals, products including Liquid Soap, Borax Substitute, Bicarbonate of Soda, Citric Acid and White Vinegar. These products are sold at prices well below many of today's high profile brands so not only are you able to be kinder to the environment you can save money too.

Liquid Soap contains only pure soap so with no additives or fragrances, great for use by people with sensitive skin. Liquid Soap can be used to clean delicate fabrics including wool, lace silk and leather. It is also

safe to use on waterproof materials such as outdoor clothing. The product dissolves instantly so it does not clump in the washing machine, particularly if being used at low temperatures. This means that it can be used to save on the cost of running the washing machine at a high temperature.

As a cleaning product a diluted solution of Liquid Soap can be used to clean leather settees, car seats, wooden and laminate floors, furniture, and floor tiles, including delicate natural stone and terracotta. To use simply place a small amount of Liquid Soap on a damp cloth and wipe the surface clean.

I hope to include more information about this product range on our facebook page over the coming weeks. Log onto www.facebook.com/brundallhomehardware to see more.

Our New Card Range

We love hearing positive comments from customers about our extensive card range. We also love finding new card designs. On a recent trip to the Cotswold's we identified a new company and have started to stock their card range.

A little bit cheeky but we hope you like these new cards.

Free local delivery on orders over £15.00. Subject to availability and weather conditions.

Move over 1976...

It's official. The summer of 2018 is the hottest on record. We will be talking about this year for the next 40 years.

There are some specific issues that I suspect will arise out of the hot weather. There are already shortages of products such as electric fans and paddling pools and these are most unlikely to come back into stock any time soon. Most products are manufactured in China and can take up to three months to import.

On a more serious note is the affect that the weather is having on water supplies and foodstuffs. It is always possible that there will be a hosepipe ban. However, if we are still permitted to use hoses we can supply all the necessary

fittings. Water butts are also available when the rain does come. You may eventually see price rises on grain based products and on hay and straw. Yields will be down and this will make products more expensive. Hay and straw used for domestic pets will become scarce as farmers wish to retain their supplies as animal winter feed.

Your lawn may be looking very sorry for itself. However, grass is very resilient and will start to green up again when rain arrives. Perhaps reseeding will help? We can advise and supply the necessary seed, but please don't try to sow new seed until rain is predicted.

Key cutting....

We're really busy cutting keys at the moment. Most likely as everyone is getting set for a holiday. Check out

our prices. We're cheaper than many larger stores. One cylinder key £4.25.

The English Winter, ending in July to recommence in August. Lord Byron.

Not this this year mate....

Hedgehog Food

At home we get real pleasure in feeding the hedgehogs which visit our garden every night. Spikes Dinner goes down a real treat. We now have many customers who visit us every week to keep their friendly nocturnal visitors happy. We've increased the range of hedgehog food to provide a little extra variety. Don't forget to put out some water in these high temperatures. Hedgehogs do die from dehydration.
